Outline

- 1 Problem
- 2 Solution
- 3 Discussion

1 Problem

- Introduction to cryptocurrency
- Cryptocurrency's volatility
- Limitations of past studies

2 Solution

3 Discussion

Cryptocurrency is a form of digital currency that is secured by cryptography

Two
lines.

One line (but
aligned).

cyay

Cryptocurrency is faster and more secure than digital cash

Cryptocurrency's volatility

Cryptocurrency prices are highly volatile

Cryptocurrency's volatility

Volatile prices make it very difficult for potential **buyers** and sellers to make decisions

Previous methods are slow and ineffective

Yayyyyyyy

One line (but
aligned).
